Q: How to extract _ and. from a path in a file and write this in a another file I have a file path named input.txt contains below: C:\Test.log I have to extract _ and. from input.txt and write these in a file named output.txt like below: C:\Test.log C:\Test How to achieve this in java? A: If your filename can be in any order, then the simplest would be to use `Matcher#find()` method: `String filename = "C:\\Test.log"; String newName = filename.substring(filename.lastIndexOf("\\") + 1); // newName now contains "Test.log"` The substring call removes the final "\\" character from the end. If you absolutely need to match only the particular paths from the path that has name ending with "\\"

What's New in the?

Retrieve and decode video frames from FLV/F4V files or other devices to create DirectShow-compatible source. The filter supports both syntaxes for F4V files, as well as FLV streams played from local drives.
